Professional Summary

MSc Information Security graduate holding CompTIA Security+ and ISC2 Certified in Cybersecurity (CC). Practical experience building Python tools and a JavaScript browser extension, with testing, API integration and Windows troubleshooting, alongside user support and technical documentation.

Technical Skills

Programming & Scripting: Python, Java, JavaScript, PowerShell, SQL
Web & APIs: JavaScript, HTML, CSS, API integration, Manifest V3
Systems & Cloud: Windows, Microsoft 365, Azure, endpoint configuration
Testing & Analysis: Manual testing, false-positive checks, log analysis
Data & Tools: Python, SQL, MySQL, JSON, Windows Event Logs
Communication & Support: User support, technical documentation, stakeholder coordination

Education

MSc Information Security, Royal Holloway University of London, United Kingdom
September 2024 - September 2025 | Merit
Modules: Cryptography, Security Management, Critical Infrastructure Security, Secure Business Architectures, Digital Forensics and Network Security.
Bachelor of Computer Applications , Maharashtra Institute of Technology World Peace University, India
September 2021 – September 2024 | CGPA: 9.17
Modules: Python, Java, JavaScript, C++, C, MySQL, AI & ML, Angular, Mobile Application Development.

Work Experience

IT Support Assistant, The Colourful Aura | London,UK | November 2024 - Present

- Administer 4–5 daily access requests in on-premises Active Directory, verifying approval, recording access periods and managing time-limited permissions.
- Analyse 4–5 suspicious emails daily, checking sender and link domains, recording findings and communicating recurring phishing patterns to colleagues.
- Support 15 employees using 15–20 devices, troubleshooting access and system issues, monitoring server health and maintaining password and website-access controls.

Person in Charge (PIC), Co-op | Fenchurch Street London, UK | November 2025 - Present

- Review operational controls through weekly risk assessments and daily compliance checks, recording findings and identifying corrective actions.
- Handle 15+ operational issues weekly, including product-date exceptions and safety concerns; document incidents, apply temporary controls and escalate unresolved risks.
- Coordinate 7–8 colleagues per shift, communicating requirements, assigning corrective actions and following up to confirm issues are addressed.

Projects

SafePaste - Sensitive Data Detection Browser Extension
JavaScript, Manifest V3, HTML, CSS, Regular Expressions

- Built a Chrome extension with 25+ detection patterns to warn users about email addresses, credentials and API keys in pasted content before submission.
- Achieved 93.7% accuracy over 150+ manual tests, including false-positive checks; kept detection local to protect sensitive content.
- Iterated detection rules through manual testing to reduce false positives, while allowing users to review flagged content and decide whether to proceed.

InboxDefender – Phishing Analysis
Python ,Gmail API, LLM, MITRE ATT&CK, JSON

- Built a Python/Gmail API phishing-analysis prototype to highlight suspicious email indicators and support manual triage, with design reviews from an experienced SOC analyst.
- Tested the prototype against suspicious and legitimate business emails, using hardcoded MITRE ATT&CK mappings while keeping sensitive email data local.
- Developing sandbox-based URL analysis to inspect linked content and enrich investigation reports while keeping sensitive email data local.

AttackSurfaceIQ – Windows Event Log Analysis
Python, Windows Event Logs, Network Analysis, PowerShell

- Built a Python tool mapping Windows error codes to common causes to support investigation of system faults across business devices.
- Used the tool to investigate server freezes and crashes, finding errors linked to missing or corrupted DLLs and informing corrective action.
- Keep log analysis local for internal troubleshooting; developing background monitoring and automated alerts for unexpected errors.

Certifications

- CompTIA Security+
- ISC2 Certified in Cybersecurity (CC)
- Ethical Hacking with Kali Linux, IBM
- Cyber Security Job Simulation, Deloitte & Mastercard via Forage
